SUMMARY

I am Samiullah Jabbar a Full Stack Developer with over 2 years of experience working both onsite and remotely for software companies.I specialize in building and improving custom websites and scalable AI SaaS web applications. I have hands-on experience integrating AI chatbots and creating solutions that help businesses grow. Currently, I provide freelance services to clients looking for reliable and quality web development. I'm committed to delivering practical, user-friendly solutions and continuously improving my skills to meet client needs.

WORK EXPERIENCE

Backend Developer Intern
August 2023 - July 2024

- During my internship at Enigmatix Software Company, I focused on Python backend development. I gained hands-on experience working with Django REST Framework and FastAPI, building efficient and scalable APIs. This internship helped me strengthen my backend skills and gave me practical exposure to software development workflows.

Junior Backend Developer Job
August 2024 - Jan 2025

- After completing my internship, I joined Enigmatix Software Company as a Junior Backend Developer. In this role, I worked on multiple practical projects, primarily using Django REST Framework for backend development. I contributed to building and optimizing APIs, improving performance, and implementing new features. This position allowed me to work on advanced-level concepts and significantly expand my technical knowledge, while learning new tools and best practices in real-world projects.

Full Stack Developer (Remote — USA)
Dec 2024 - Present

- While working at Enigmatix Software Company as a Junior Backend Developer, I also took on a part-time remote role for a USA-based software company. During this time, I began learning frontend development to transition into a Full Stack Developer. This growth led to my current role at Pascat Graphics & Marketing Web Design Company in the USA, where I work on projects covering both backend and frontend development.
